## PARKER UNIVERSITY'S PROGRAMS IN COMPUTER INFORMATION SYSTEMS

In the continuously growing information technology field, students must be agile and prepared. Our rigorous standards and high-caliber curriculum push students beyond the expected so they can enter the marketplace with a competitive advantage. In our fully online program, students learn to provide rapid solutions to security needs, store and secure private information, and assess risk management policies so they are positioned to succeed and lead upon graduation.

WHY PARKER'S COMPUTER INFORMATION SYSTEMS PROGRAM?

- A flexible 100% online program

Parker's Computer Information Systems programs are geared toward building a solid understanding of theoretical methods, principles, and tools crucial to information systems and technology issues and processes. Topics include virtual technologies, business intelligence and analytics, ethics and law, computer networking, database technologies, IT governance and strategy, online and mobile application development, and information security and assurance, based on the level of degree or certificate.

The online program provides a blend of theory and applications, preparing students for a variety of positions in scientific and business fields, and can lay the foundation for graduate studies as well as employment in a wide range of industrial and technological environments. Real-world problems and opportunities with software-intensive systems are explored, and methods to evaluate, adopt, and take advantage of emerging technologies are addressed.

STATS

15% Growth Rate[1]	15% projected employment growth rate for computer and informations systems managers through 2032.
557,400 Jobs[1]	557,400 available jobs for computer and informations systems managers.
$164,070 Median Income[1]	Median income of $164,070 according to the BLS.
