

Igniting Passion. Transforming Lives.

Covid-19 Disclosure Form

After the COVID-19 pandemic, clinical sites hosting Diagnostic Sonography (DS) students for academic activities such as observations, demonstrations, and clinical rotations may require students to be fully vaccinated with two COVID-19 vaccine doses.

While this is not a decision made by the program but by the clinical sites, it does pose a risk to unvaccinated students of a significant delay or cancellation of their clinical placement(s). A delay or cancellation in any clinical experience(s) could result in financial implications and delay students' graduation date.

Parker University continues to support personal responsibility and choice, however failing to obtain the COVID vaccination/booster(s) could result in a loss of opportunities to participate in required program activities and clinical rotations, and thus could result in delays in completing your program.
